Behavior

NAME _____

Element lab

Purpose: Observe physical and chemical properties of seven elements. Group them according to similarities in those properties.

Lab report:

Purpose: Restate the purpose or reword it to create a title

Procedure (Materials and Methods): In paragraph form, briefly describe what you and/or your group did in the lab. Be detailed enough that the reader could repeat your procedure exactly as you had performed it.

Data: Include tables as appropriate with explanations for each. In this lab you will include your groupings as well as the data you collected.

Conclusion/Discussion: Since you are not testing a hypothesis in this lab, discuss your reasons for grouping the elements the way you did
